**Observations:**

1. At 48 hours, following step 3, all three levers (sample ref's C1, D1 and D2) showed a small amount of white corrosion to the ridged sections.
2. At the end of exposure duration, following step 10, all three levers (sample ref's C1, D1 and D2) showed a very slight increase in white corrosion to the ridged sections.  
There was no corrosive attack or any other obvious changes evident to the handles (sample ref's A and B).

**Remarks**

1. Digital photos are supplied on accompanying CD.
